Carlos Barbosa-Lima is a fine guitarist, and here he has created stunningly beautiful, elegant arrangements of several timeless compositions by the great Spanish composer, Isaac Albeniz. Although this book is best-suited for an intermediate to advanced player, there are lead sheets for beginner to intermediate players, which serve as a helpful guide to the structure of each composition. I admit that initially I could not play the pieces when I first purchased the book and was a bit discouraged. But, with time and progress, it is extremely gratifying to play through each piece and to continually master each one. I would recommend this book to all classical guitarists and even to guitarists who are interested in a good primer in Spanish classical guitar.

Are Albeniz's works really this complicated, or are these just poorly arranged? I have not officially played through all of the works contained in this book. But upon listening to the cd and visually following these songs I find myself unimpressed. The arrangements seem really awkward and complicated. This book also contains a solo version of each of these songs. But they are simply the

easy versions, and do not offer much in the sound department. I would consider them useless. Also, one of the songs on the cd is not in the same order as the book. But I don't consider that a big problem. Are these some of the best of Albeniz's works? I don't think so. I would look elsewhere for Albeniz transcriptions.
