Snowboarding! Shred The Powder (The Extreme Sports Collection)

Synopsis

Accelerated Reader is a program based on the fact that students become more motivated to read if they are tested on the content of the books they have read and are rewarded for correct answers. Students read each book, individually take the test on the computer, and receive gratification when they score well. Schools using the Accelerated Reader program have seen a significant increase in reading among their students. These new middle school titles are a valuable addition to any library.

Customer Reviews

Gr 5-8-These books all begin with a paragraph explaining the use of the word "extreme," followed by discussions of the history of the sport, the equipment needed to get started, techniques, and safety considerations. While the series title implies that these books would be most appropriate for advanced and aggressive practitioners, they do offer information for beginners. The well-placed, full-color photographs include many action shots that create a fluid movement of their own. All of the titles have lists of books, magazines, videos, related Web sites, and camps and competitions. They are more detailed and for a slightly older age group than the "Radical Sports" series (Heinemann Library).-Rachel Fox, Port Washington Public Library, NY Copyright 2000 Cahners Business Information, Inc.

"The boys in my library have been reading this series during their study halls and their response has

been overwhelming . . . written in a conversational tone full of helpful, interesting information. There are plenty of other books on these subjects, but they lack the hip layout of text and photography that first draws the readers to this collection. . . . Should be a hit in any middle school library. HIGHLY RECOMMENDED!" --This text refers to the Paperback edition.

The book was a little bloody story because snowboarders get hurt very often. The setting of the story was during the winter in the mountains. The main characters of the book were Sherman Popper, Bob Webber, and Dimitrije Milovich. My favorite character was Sherman Popper because she was good at snowboarding and she did tricks too. My favorite part of the book was when it told you what you need to snowboard. I would recommend this book to my friends, maybe they will try it once. However, I will tell them to read it if they are 13 years old or more because if they are younger they will get hurt.

The book was a little bloody in its descriptions. The story was set in the snowy mountains. The main characters in the book were Sherman Popper, Bob Webber, and Dimitrije Milovich. My favorite character was Sherman Popper because she was good at snowboarding and she did tricks too. My favorite part of the book was when they told you what you need to snowboard. I would recommend this book to my friends maybe they will try it once. However, I will only tell them if they are 13 years old or older because if they are younger they might get hurt.

This book doesn't really teach you how to snowboard, but it does contain some good history and facts. Interesting to read.
