Customer Reviews

D.A. Saia, MA, RT(R) (M) (Ridgefield, CT) is Adjunct Faculty, Radiologic Technologies Program, Concordia College, Bronxville, New York. She has been teaching radiography for more than 35 years.

This review book is OK. I feel like the 8th edition of SAIA was way more helpful (yes even though it's an older edition).

Good review book, studying for my ARRT boards. I like how this book gives the correct answer along with explanation to go with it. However my class did find a few flaws with the book where the answers were wrong. Overall a very good review book. Good luck to everyone who's studying for their boards.

I used this book partially along with radrevieweasy. This book has the same questions as the website, but the website is easier to study with because it keeps track of everything and scores for you your tests. This book isn't bad, but the website is better.

I just bought this book, so I'll be scheduling my exam in the next couple of days. This book is AMAZING. It not only gives you the answer to the correct one, but it elaborates, fully on information about the other possible answers too. I highly encourage you to buy this book. I am preparing myself for my arrt boards and this will definitely prepare you. Good luck Everyone. I hope this review helps if not all, at least someone

The most helpful book I have found to help me pass my ARRT registry. The book not only gives you the correct answer, but it explains why it is the correct answer and why the other answers are wrong. It also comes with a CD that has the same 2 200 question review tests that are in the book for you to practice and see what the real ARRT test is similar too. I would recommend this to anyone.

Love it. Thanks

Excellent price and fast shipping!

Exact same questions as radrevieweasy .com...Wasn't bad, but didn't help anymore than the

website
