Customer Reviews

Touring Arizona Hot Springs guides you to more than twenty-five of the state's best hot springs, whether you're seeking a mineral soak or looking for a sightseeing adventure. Historian and veteran outdoors author Matt Bischoff reveals his favorite "hot spots," from primitive pools in the backcountry to whirlpool mineral baths near civilization. For more than twenty-five years, FalconGuides® have set the standard for outdoor guidebooks. Written by top experts, each guide invites you to experience the adventure and beauty of the outdoors. Look inside to find: Firsthand descriptions of soaking locations Detailed maps and directions Historical background information on the hot springs and their surroundings Tips on safety, access, and availability of services Best time of year, restrictions, water temperature, camping info, and more

Matt Bischoff lives in the foothills outside of Sacramento, California, with his wife, Patty, and son, Luke. He is a professional historian by trade, currently working for California State Parks. One of his greatest enjoyments is exploring God's creation and seeking out new hot springs. Often, the story surrounding the hot spring is just as interesting as the hot spring itself, as each one has its own unique history. The hot springs listed in this book are some of his favorites for a variety of different

reasons. His hope is that you will find the same thrill in discovering a new hot spring or learning a little bit more about its story.

This guide got me into exclusive places during the Federal Government Shutdown of 2013. Specifically the Arizona Ringbolt Hostsprings. Seriously, the difference between a guide book like this, and a lonely planet guide book is night and day. The wealth of information in this guide book must have taken many years to accumulate. A lonely planet book will say on it, "all this information was gathered in 2 weeks" or some tiny amount of time. Many of these spots are off the beaten track and as a novice outdoorsman i really appreciated the adventures this book brought into my life! This guidebook gives very specific instructions on how to get to unmarked hot springs. Without this book you would have to know a local person who could show you the way.

Light and easy to carry if you are traveling in Arizona

It was helpful in finding a few springs that we would have otherwise not known about.

This book is well organized and the information and directions are interesting and easy to follow. I love tracking down these springs and have found this book to be a fun guide to keep in the car.

Great directions, good descriptions of springs.Used another guide to find springs near Childs Power Plant near Strawberry, AZ. I ended up on a rough road for 25 miles in a loaded down Honda with friends following us. If I had used the Falcon Guide, I would have been there no problem.

The book came in excellent condition

cool

I bought this book after I realized I had a desire to see and soak in as many hot springs as I can. Unfortunately I will be going to AZ in the summer and it will be too hot. The book is well written, informative and gives a beginner soaker all the necessary information that they will need to enjoy this experience including precautions and clear descriptions of the experience. I will be touring the only hot spring in the location this summer that will be close to my destination and that is OK to go during the summer. Without this book, I would not have known which springs would be insanity to

go into during summer months.
