Human Tooth Crown And Root Morphology: The Arizona State University Dental Anthropology System

Synopsis

This guide to scoring crown and root traits in human dentitions substantially builds on a seminal 1991 work by Turner, Nichol, and Scott. It provides detailed descriptions and multiple illustrations of each crown and root trait to help guide researchers to make consistent observations on trait expression, greatly reducing observer error. The book also reflects exciting new developments driven by technology that have significant ramifications for dental anthropology, particularly the recent development of a web-based application that computes the probability that an individual belongs to a particular genogeographic grouping based on combinations of crown and root traits; as such, the utility of these variables is expanded to forensic anthropology. This book is ideal for researchers and graduate students in the fields of dental, physical, and forensic anthropology and will serve as a methodological guide for many years to come.

Book Information

Paperback: 342 pages

Publisher: Cambridge University Press; 1 edition (March 30, 2017)

Language: English

ISBN-10: 1107480736

ISBN-13: 978-1107480735

Product Dimensions: 6.8 x 0.9 x 9.7 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)

Customer Reviews

This guide to scoring crown and root traits in human dentitions is ideal for researchers and students. It provides detailed descriptions and illustrations of forty-two dental and oral traits, and is supplemented by a web-based application that can help evaluate the ancestry of an individual in a forensic context.

G. Richard Scott is Foundation Professor of Anthropology at the University of Nevada, Reno. He focusses on Southwest Indians, Alaskan Eskimos, Norse in the North Atlantic, and Spanish Basques. He is a past president of the Dental Anthropology Association. Joel D. Irish is a Professor

of Biological Anthropology at Liverpool John Moores University. He has traversed the length and breadth of Africa studying teeth from Plio-Pleistocene hominins and recent Arabs in the north to Zulu in the south. He is a past president of the Dental Anthropology Association.
