The book discuss the principle use of dental ceramics and give a detailed information on application of dental ceramic to metal to achieve the best result. The basic of a properly made restoration is the shape and the color of the fixed prostodontics. The book overview different types of ceramic methods and give excellent information using them alone or mixing, demonstrating teeth samples, for dentists and ceramist. the writer point out the disadvantages and problems of dental ceramic when the CTC (composite tooth color) is not measure properly. From his book the readers get information on technical procedurs of dental ceramics in laboratory and dentists will be able to realise the need of a good communication between the lab and the office. And finally I would like to advise the book for all dentist and ceramists especially to teams working together and would reach excellent results. I wish to
