Customer Reviews

This is a very informative guide. It begins by talking about what hair is and how it grows. It goes into what is needed for hair to stay strong and healthy. Then the book shows how changes in these conditions can cause people to lose their hair. The book explains many types of hair loss. Once you understand all of that, the book goes into different treatment methods available. It covers medical treatments, surgery, natural treatments, and other alternative treatments. It explains how each kind of treatment works and lists the side effects of each one. By the time you finish reading this guide,

you will be able to decide which treatment is best for you.

to short and not enough details. You can google "Hair Loss Treatments" and find free blogs with more detailed information.
