Coloring is fun! It can be even more fun when you're learning something while coloring. Each drawing in this coloring book has a colored sticker to match so that you can place the sticker next to the drawing. While you color, you can refer to the sticker to color each mammal realistically. Covering more than 170 species, this is the most comprehensive mammal coloring book available when it's finished it becomes a field guide you've created yourself, making it truly meaningful and educational. Peter C. Alden is the author of many books, including the Peterson First Guide to Mammals of

North America. Fiona A. Reid has led nature tours for Questers Tours and Travel, New York, for the past decade, showing tourists the wonders of diverse lands from Indonesia to Alaska to Venezuela. An accomplished writer and artist, she has written and/or illustrated numerous field guides, including A Field Guide to the Mammals of Central America and Southeast Mexico, The Golden Guide to Bats of the World, and Mammals of the Neotropics.

Works great for our CM education - perfect companion for Burgess Animal Book.

I am a naturalist by profession and a retired environmental teacher. The children I have shown the field guides to have been so enthusiastic about the sticker/ coloring aspect. A great hands on activity to learn about nature.

These are great for children learning about the world. We are using these to teach children to draw. They are simple line drawings as opposed to a photograph. They are true to life rather than being cute or cartoon images.

Excellent graphics. Easy to use.
