Customer Reviews

My opinion on this book is that every herpetologist or avid reptile, amphibian or invertebrate keeper should have this book. This book has helped me with numerous problems with my terrarium collection, from terrarium decor to building your own terrariums. The book also discusses what decor, terrariums, diet and lighting for the certain reptile, amphibian or invertebrate you wish to have or you already have. With this book my collection has grown over the years, because I've learned how to save money on collection. I've lended this book only to my close friends, since I cherish this book so much. So I hope for all those avid reptile, amphibian and invertebrate keepers out there, that this is the book you should get.

One of the best books, very well done. Info about very many species (almost all ;). Categorized very good, with snakes, reptiles, tarantulas and so..Recommend this one!
