I am a true crafter. This book with a little elbow grease in sanding or if you have a planer with a nice stain and clear coat or just some good oil to bring out the beauty. these item would make great donations for charity gift to college student first apartment and the list goes on. But the best thing it just green reuse. and the prices of 2x4's are cheap

to any wood worker's and/or crafter's library;concise details given with specific instructions and material(s) listI am happy to have this book in my library ;)

If you can run a saw then you can make these great projects.Easy to read and follow.The projects are ones that you can use daily to beautify your house and yard.

Book is not 2 by 4 reliant, relies on a lot of precut smaller boards. Basically irritating and fails to deliver on the title.

Great price

This book is pretty good. It has some nice projects. Look for it at a discount and it's worth the money, however I wouldn't pay full price for it. The book is not outstanding.

I received this book timely but the projects are very outdated. I probably would not build anything in this book. It sits on the shelf somewhere.

Other than where a sale sticker was removed it is new and was shipped quickly. Book looks interesting, always have 2 x 4's laying around maybe find some projects
