The Ultimate Book Of Space

Synopsis

With all the features that made The Ultimate Construction Site Book a bestseller, this oversized volume offers a fact-filled and action-packed look at the amazing universe of outer space. Bursting with 40 flaps, pop-ups, pull tabs, and movable parts, The Ultimate Book of Space provides a richly illustrated, hands-on exploration of space travel, the Earth's place in our galaxy, the solar system, and so much more! Sure to encourage curious young readers to venture deeper into space, this is a must-have book for any budding scientist's library.

Book Information

Hardcover: 60 pages

Publisher: Twirl; Ina Ltf No edition (October 18, 2016)

Language: English

ISBN-13: 979-1027601974

ASIN: B01AGIOSQ2

Product Dimensions: 10.1 x 1.2 x 13.2 inches

Shipping Weight: 2.6 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 33 customer reviews

Best Sellers Rank: #56,582 in Books (See Top 100 in Books) #33 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Aeronautics & Space](#) #49 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Astronomy](#) #1038 in [Books > Children's Books > Science, Nature & How It Works](#)

Age Range: 4 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

K-Gr 4 **•**Open this pop-up book to take a journey through the solar system, identify stars in the night sky, and even learn about the types of rockets that get astronauts (and needed supplies) to the International Space Station. The small flaps on each page open to facts about equipment used in space walks and more. Kids can follow the chapters in order or jump from "Landing on the Moon and Mars" to "The Milky Way." Though the material covered is not in-depth, it is current and includes Pluto as part of the Kuiper belt rather than as a main planet of the solar system. With clear, vivid illustrations, this selection is more a conversation starter about space exploration than a go-to text for a science report. The low contrast of the font in a few sections, along with the size of the flaps, makes this title better suited for an older audience. The amazing spiral pop-out section on the

universe depicts the magnitude of the solar system in a tactile way that will build a better mental image in readers' minds of Earth's place in the universe. VERDICT A fun book to ignite curiosity about the solar system. —Karen Ginman, BookOps: The New York Public Library and Brooklyn Public Library

"A fun book to ignite curiosity about the solar system."-School Library Journal

It's very cool. My kid likes it. The segment on the international space station is surprisingly bland and lacking in detail for these guys. Also, they didn't go into detail on the Orion capsule, the space shuttle, the SpaceX rockets/capsules or the Hubble space telescope. Its mostly goofy Russian and European gear. Not as detailed as the first two books. This is maybe about half as detailed and rich as the construction site book... that's the best one.

Both my 5 year and 3 year love this book. The pop outs are really cute and intricate. Prepare for it to get torn in places thou.

This is an incredible book! I got it for my space-loving 4.5-yo son for Christmas & he loves it. It's very detailed & he spends so much time poring over each page, opening every flap, spinning each wheel, and with all the tabs, pop-ups, etc. I love that it's factually based for his hungry mind. Great quality & price - it reminds me of an Usborne book without the steep price point.

3 yr old son loves all these books. There good for kids several years older too

Excellent book for the space loving little in your life!

Not quite as good as the vehicles one, but still exceptionally fun books. You should buy both.

My 4 year old daughter loves this book! That's all I need.

My son is 4 and absolutely loves this interactive book. He asks for it every night! Love it
