Fabulous & he is an older soul so far sighted in seeing how our diet & lifestyle choices for our pets (& ourselves) adversely impacts the planet, her resources. This puts at risk all life including future generations at risk. Humanity needs to shift their attitude, etc. & take better care of the planet & her resources. I greatly valued the sections on diets: organic meat, vegetarian & vegan. My mother's dog's diet was upgraded so all factory meat was replaced w/ organic tofu, lentils or cooked eggs. After a few days, she is more active chasing her 4 tennis balls at the dog park! Her energy is better b/c easier digest foods lower in the food chain. I let go 2 older books by Richard H. Pitcairn & his wife.

I know the Pitcarins are very thorough in their studies and investigations and trust them to give their honest opinions about animal care. I was surprised at their latest vegan recommendations, and again am confident in the accuracy of their information. Looking forward to gathering more info on it and considering trying it - would be so much better for the environment! Really happy to see the update!

The book is based mostly on feline conditions. If you looking for dogs natural health this is not right

book. Disappointing. :(

Great informational book about how to care for pets and their daily care.

This is an excellent book. Very educational.

We have used this guide at our local sanctuary for years and it has been very helpful. This year there is a focus on vegan diets for dogs which I have found successful providing compassion for all animals.

Excellent

For anyone who loves their pet and our world!
