My Five Senses (Let's-Read-and-Find-Out Science 1)

Synopsis

Sight, smell, taste, hearing, and touch—our five senses teach us about our world. Beloved author-illustrator Alikì's simple, engaging text and colorful artwork show young readers how they use their senses to smell a rose or play with a puppy. Now rebranded with a new cover look, this bestselling picture book invites young readers to use each of their five senses to explore the world around them. Both text and artwork were expert-reviewed for accuracy. As Children's Books and Their Creators put it: Alikì "treats complex topics clearly and succinctly while providing lively pictures, with informative details and humorous elements often appearing in 'balloons.'" Alikì's books continue to speak to today's young readers. This is a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades and supports the Common Core Learning Standards and Next Generation Science Standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

My son, daughter and I really love this book. The illustrations are really cute. It is easy to read and understand for curious toddler. It is a perfect book to use along with hands on activities on the senses. We already read it a few times and we also used it to illustrate to taste and the smell. Each sense is very well explained with easy word.

Nice illustrations and not too wordy for a toddler to listen and to appreciate.

Wonderful book

Great book

This book is excellent, even for a preschool aged child, as it really breaks down the five senses in a basic way. An example is provided for each sense and then, the book explains that sometimes senses are used at the same time- examples are provided for this concept, as well! I used it in my preschool class when our theme was "The Five Senses!"

The book was well written with nice pictures. I guess that my comments are more about how the book is marketed. It lists 4-8 as its target audience. As a parent read book, this should be listed as

more of a 2-3 year old book. I don't think that this would be my choice of a learning to read book. I thought that the book was about science. On that note, my barely 4 year old daughter had already learned about smelling, seeing etc. I had hoped that the book would have taken senses to another level, but it didn't. I would strongly recommend this book to parents of younger children, but it was regrettably a one and done for my daughter.

This book is perfect for our unit on senses in kindergarten. Well written!

I used this book at a job interview at the Teacher Equity Project charter school and didn't get the job. Great book!!!
