Barbara. She has traveled extensively throughout the country and the world giving training seminars on her approach to working with children and adolescents. Dr. Oaklander's unique approach to working with children -- which combines Gestalt Therapy theory, philosophy, and practice with a variety of expressive techniques -- has won international recognition and she has received several awards for her contribution to the mental health field.

This book has many therapeutic ideas for groups. As a therapist I highly recommend it; however, some of the activities seems to work better with younger children.

I have incorporated almost every activity in group sessions and individual sessions.

As a Counseling Psychology student this book has been very helpful and worth the purchase when it comes to coming up with techniques to use. Recommend for every student looking to figure out different possible option to try.

Great!

There is no better publication to be read on the topic of Gestalt Therapy for Children than "Windows of our Children". Violet is the pioneer and conceptualizes the original theory of 'gestalt' in a very special way.

excellent!

Just what I expected

I have always been interested in the Gestalt therapy approach and decided to purchase this book based on the author experience and online reviews. I am very satisfied with the book, it is pleasant to read and a good source of practical examples and literature references. I would recommend it.
