Ultimate Bodypedia: An Amazing Inside-Out Tour Of The Human Body (National Geographic Kids)

Synopsis

This fun, smart guide to the human body answers kids' questions and engages them with amazing facts, photos, illustrations, and diagrams. The kid-friendly journey travels through the body and all its systems and is sprinkled throughout with plenty of health tips, top 10 lists, simple experiments, and weird-but-true wacky details. Young readers will learn about age-appropriate medical history and body basics, from cells and DNA to growth and aging.

Customer Reviews

PATRICIA DANIELS has been an author and editor for National Geographic. She has written and edited books on history, science, and geography for both children and adults and was an author for National Geographic's *Body: The Complete Human*. Patricia lives in State College, Pennsylvania. CHRISTINA WILSDON grew up on Long Island in New York. She has written numerous kids books about animals and science. Christina lives with her family in the Pacific Northwest, where bald eagles nest in the city and orcas surface just offshore. This is Christina's first book with National Geographic. Visit Christina's website at <http://christinawilsdon.blogspot.com/>. From the Hardcover Library Binding edition.

My daughter is six and she is an advanced reader. She showed interest in human body about a year ago. First human body book that I actually purchased for her (not borrowed from library) was DK publishing my first human body encyclopedia. It was a good introductory book. Since then, she read all the human body books from the local library, and I needed something new that she hasn't seen (i pre-ordered this book) and something thick so that she could be entertained for long period of time. This book is full of colorful pictures, drawings and facts that are very interesting (even to adults). My daughters vocabulary is expanding and this book is worth every penny (On the side note, we also have "ultimate bug-pedia" by national geographic, but my daughter is not so into that book.....)

My son loves the human body and facts. So this was the perfect addition to our homeschool library. I will also be using this for our human body unit when it comes to that time. We love buying the National Geographic Kids books. They are always awesome to read and you learn so much from them.

My 8 year old loves this book! It is full of fun, interesting information that keeps a child interested while they are learning. We have 5 National Geographic books and we love all of them. Worth every penny!

My kids love these kind of books. They read them at night before they go to bed and they know some of the strangest facts, but also I think that it helps them want to learn more about the subjects! This one also does not disappoint.

Another slam dunk from National Geographic. 1-3 pages a night is great bedtime reading!

My 4 year old is very inquisitive and especially interested in the human body. This book was worth every dime, she loves reading it and its so thick that it will give us many many nights of bedtime reading!

Our daughter was excited!

Bought this for my 11 year old granddaughter. She loved it.
