CPM Construction Scheduling Survival Guide: Strategies For Managing & Optimizing Time And Budget

Synopsis

Project scheduling is a difficult and misunderstood component of the construction process, and for that reason it stands out as a problematic issue. The most efficient companies will have a schedule for each of their projects, and will update these schedules every month, whereas the least efficient will have only a start and finish date to work with. Simpler projects may not require complex schedules; in fact, they may not require one at all other than the contract start and end dates.
