Synopsis

This handy, pocket-sized manual is the perfect field companion! It provides quick, easy access to guidelines and protocols for the health supervision of children in ambulatory settings. Clear and concise -- and with an emphasis on health education and prevention of illness -- the book is divided into three organized units. Part I - Well Child Care: Is organized by age-span and includes specific factors to be investigated; areas to be assessed; age-appropriate information for anticipatory guidance in the physical, emotional, intellectual, and social aspects of development; and child-rearing issues. Part II - Common Pediatric Health Problems: Provides succinct protocols of management for 67 of the most common pediatric health problems, and includes etiology, incidence, communicability, differential diagnosis, management and nursing care, and in-depth family teaching. Current topics like AIDS, anorexia and bulimia are also covered. Part III - Drug Index: Current guidance for 68 commonly used drugs, organized in outline format. Administration, timing, side effects, complications, and re-ordering are discussed for each drug. In this edition: Injury Prevention Guidelines for Every Age Group; New Guidelines for Pertussis, Poison Ivy/Poison Oak Dermatitis, and Sinusitis; 11 New Drugs; New Pediatric Immunization Schedule.

Customer Reviews

This book was just ok. Too busy and more than what you need for a clinical rotation. Some of the material seems outdated.

Compact, easy to navigate, must-have resource for any PNP student. I use it every day during my clinicals and use it for every case study I have to write. It has well child care for every age, anticipatory guidance for every age, immunization schedules, common diagnoses with plans, and is written by MA RNs and NPs!

works great in my walkin clinic setting
