# The Domestic Animal/Wildlife Interface: Issues For Disease Control, Conservation, Sustainable Food Production, And Emerging Diseases (Annals Of The New York Academy Of Sciences)

## Synopsis

During the last century, the conservation of wildlife and the need to increase the production of animal agriculture, particularly in developing countries, have been in conflict at times, yet both have clear financial, biological, social, and even spiritual value for society. This volume addresses the problems of disease in both wildlife and domestic animals and the transmission of disease between the two populations. It examines ways in which we can conserve and manage animals in both sectors for optimal health and production, while preserving ecological communities. Diseases as diverse as tuberculosis, foot and mouth, and rinderpest are discussed. Global disease surveillance, the transmission of diseases between animals and people, and human dependence on healthy livestock and wildlife are also emphasized.

Table of Contents:

- Part I. The Importance of Disease in Wildlife and Domestic Livestock and the Relationship to Issues of Conservation and Sustainability
- Part II. Approaches to Disease Control.
  - A. Diagnostics: Viruses
  - Part II. Approaches to Disease Control. A. Diagnostics: Bacteria
  - Part II. Approaches to Disease Control. A. Diagnostics: Protozoa
  - Part II. Approaches to Disease Control. B. Vaccines, Immunology, and Genomics: Viruses
  - Part II. Approaches to Disease Control. B. Vaccines, Immunology, and Genomics: Bacteria
  - Part II. Approaches to Disease Control. B. Vaccines, Immunology, and Genomics: Protozoa
  - Part II. Approaches to Disease Control. B. Vaccines, Immunology, and Genomics: Arthropods
  - Part II. Approaches to Disease Control. C. Epidemiology, Surveillance, and Disease Management: Viruses
  - Part II. Approaches to Disease Control. C. Epidemiology, Surveillance, and Disease Management: Bacteria
  - Part II. Approaches to Disease Control. C. Epidemiology, Surveillance, and Disease Management: Protozoa
  - Part II. Approaches to Disease Control. C. Epidemiology, Surveillance, and Disease Management: Arthropod Vectors
- Part III. General

## Book Information

Series: Annals of the New York Academy of Sciences

Paperback: 369 pages

Publisher: New York Academy of Sciences; New ed. edition (May 1, 2003)

Language: English

ISBN-10: 0801878276

ISBN-13: 978-0801878275

Product Dimensions: 9.2 x 6 x 0.8 inches

Shipping Weight: 1.2 pounds

Average Customer Review: Be the first to review this item

Best Sellers Rank: #10,013,898 in Books (See Top 100 in Books) #65 in Books > Medical Books > Veterinary Medicine > Epidemiology #1974 in Books > Science & Math > Agricultural Sciences > Sustainable Agriculture #4041 in Books > Medical Books > Administration & Medicine Economics > Public Health > Epidemiology

## Customer Reviews

E. Paul J. Gibbs works for the University of Florida, Gainesville. Bob H. Bokma works for the National Center for Import and Export, Riverdale, Maryland.
