What Will The Weather Be? (Let's-Read-and-Find-Out Science 2)

Synopsis

Will it be warm or cold? Should we wear shorts or pants? Shoes or rain boots? This picture book explores why the weather can be so hard to predict. Now rebranded with a new cover look, this classic picture book uses colorful, simple diagrams to explain meteorology in a fun, engaging way. Perfect for young readers and budding meteorologists, this bestseller is filled with rich climate vocabulary and clear explanations of everyday weather instruments like thermometers and barometers. Both text and artwork were vetted for accuracy by Dr. Sean Birkel of the Climate Change Institute at the University of Maine. This is a Level 2 Let's-Read-and-Find-Out, which means the book explores more challenging concepts perfect for children in the primary grades and supports the Common Core Learning Standards and Next Generation Science Standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

Book Information

Series: Let's-Read-and-Find-Out Science 2

Paperback: 32 pages

Publisher: HarperCollins; Reprint edition (August 4, 2015)

Average Customer Review: 4.1 out of 5 stars 18 customer reviews

Best Sellers Rank: #58,616 in Books (See Top 100 in Books) #43 in Books > Children's Books > Education & Reference > Science Studies > Environment & Ecology #65 in Books > Children's Books > Education & Reference > Science Studies > Nature > Weather #90 in Books > Children's Books > Education & Reference > Science Studies > Nature > Environment

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

Kindergarten-Grade 4-- While such concepts as cold and warm fronts are clearly explained and effectively illustrated, so many terms are introduced here that young readers may come away a bit confused about barometers, anemometers, wind vanes, hygrometers, and air pressure. This is still

good introductory material to what can be a complex topic, and it could be used effectively if followed by class discussion. Illustrations are brightly colored and friendly, featuring the same boy, girl, and cat on most pages. Titles for the same audience include Kirkpatrick's *Look at Weather* (Raintree, 1985) and Rogers's *What Will the Weather Be Like Today?* (Greenwillow, 1990).- Rosie Peasley, Empire Union School District, Modesto, CA Copyright 1991 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

âœGood introductory material to what can be a complex topic, and it could be used effectively if followed by class discussion.â • (School Library Journal)

Purchased this for our kindergartener who loves the weather, and to fulfill a reading requirement at his school. While this book is great, it's pretty long and detailed for a 5-6 year old. Our son is too clever for us to skip over parts these days, so while this book won't become a favorite, it is full of good information that's easy to understand (I even learned a thing or two!) and while it's not "over the head" of a kindergartener, the length is.

My four year old loves this book. After previously ordering a book that was plain and too advanced, I am glad I decided to buy this one instead. He has absorbed and memorized more information from this book. I would suggest this to other parents whose children are 3-5, and like to learn about the weather

Cool book. Bought it for babysitting the neighbor kid. He enjoyed it and I did too actually..!

I am homeschooling my 4 year old preschooler and we are big fans of the Let's Read and Find Out Science books. Although some of the concepts in this book were a little advanced for him, he did learn a lot from it, gained some new vocabulary, and enjoyed reading it. As he gets older we'll be able to get more from it.

This book is so great! I love how it explains how the weather works. The condition of the book is not good at all. Poor condition.

It's pretty boring for young kids, too technical, but for older children it might be good.

Lots of information so read it in sections to Kindergartners during a weather unit.

thought it was more preschool age. This book did not hold there attention was able to explain to them about certain details and pictures.
