Grade Level: 7 - 12

Customer Reviews

Gr 6â8â Each of these slender volumes introduces a recognizable structure, explaining its social and historical context and why it is remarkable for its architecture and its impact on its society. The texts follow a logical progression from plans to build, through the building process, to ample description of how each one was used in its time, and then to the destruction and current plans for restoration. Photographs, images, and drawings, some of which serve to explain the occasionally difficult vocabulary, appear throughout. Medieval Castle traces the development of castles from wooden buildings to massive stone constructions that served as fortresses, social centers, and living quarters for noblemen. The Parthenon is described as "the most perfect structure ever erected," and the genius of its design, which has been copied for centuries, is being closely studied as restoration continues. The Colosseum was once the site of extravagant performances and some of the bloodiest exhibitions ever staged. Although these volumes are fact-filled and would provide ample information for reports, they read like stories, with historical and anecdotal passages that add

interest to the technical and historical data. Despite their challenging content, these titles will interest readers of history and fans of art and architecture.â ”MaryAnn Karre, West Middle School, Binghamton, NY
